EXPERIENCE

Data Engineer Intern **Remote | United States**

Glynac AI *October 2026 - Present*

- Building a secure Salesforce data pipeline with PII masking and resumable CRM data ingestion for AI applications.

Data Engineer Intern **Remote | United States**

Springer Capital *June 2026 – September 2026*

- Architected an end-to-end RAG pipeline for document extraction, PII masking, semantic chunking, Sentence Transformer embeddings, vector retrieval, and LLM-based compliance analysis.
- Led a cross-functional engineering team in building an AI-powered compliance document review platform, owning data architecture and system integration.
- Built an asynchronous, privacy-preserving worker pipeline with Celery and Redis, decoupling AI processing from the API layer while enforcing secure PII handling throughout the workflow.

Web Developer **Miagao, Iloilo**

UPV Komsai.org *Feb 2026 – Apr 2026*

- **Developed and iterated on a production website** using **HTML, CSS, and JavaScript** within an Agile engineering team.
- **Applied collaborative software-engineering practices** with **Git/GitHub**, including feature branching, pull requests, code reviews, and structured commits.

Projects

SolNexus **Work in Progress**

- *A data integration platform designed to centralize SolTech's fragmented clinic lead and client communication data into a unified, structured, and searchable system.*
- *SolNexus replaces manual spreadsheet-based lead tracking with an orchestrated data pipeline and an authenticated dashboard for managing clinic relationships, follow-ups, and communication history.*

EDUCATION

University of the Philippines Visayas **Miagao, Iloilo**

B.S in Computer Science *Expected Graduation, July 2028*

SKILLS

Programming Languages: Python, SQL

Databases & Data Stores: PostgreSQL, pgvector, Redis, MinIO

Data Engineering: ETL/ELT Pipelines, Data Validation, Data Modeling, Apache Airflow, Pandas

AI/Data Infrastructure: Vector Embeddings, Semantic Search, RAG Pipelines, LLM Data Infrastructure

DevOps & Infrastructure: Docker, Docker Compose, Alembic

Version Control & Collaboration: Git, GitHub, Jira
